Quarantine of health staff who are exposed to COVID-19 patients

It was brought to my attention that an explanation is needed on the period of quarantine for the health staff who are exposed to COVID-19 patients.

Samples should be obtained from all the health personnel who are exposed to COVID-19 patients and under quarantine, on the 10th day of exposure.

They should be discharged from the quarantine centers after completion of 14 days from the exposure, if the PCR test result is negative.

Any clarification on this regard can be obtained from Dr. Sudath Samaraweera – Chief Epidemiologist (0777903407).
