

Entry Requirements for Repatriating Fiji Citizens

Bula Vinaka!

As a Fijian Citizen/Passport holder you are welcome to return home.

Process:

1. All Fijian Citizens repatriating to Fiji must undergo a COVID-19 test for a sample collected at most 72 hours prior to departure to ensure your safety and others that you will be traveling with.
2. Please note, a pre-departure COVID-19 test for returning Fijian Citizens is mandatory. The COVID-19 test must be on the RT-PCR testing platform and the Citizen is required to carry the printed test result while traveling. Rapid tests, antigen/antibody tests, home collection tests are not acceptable.
3. If the Fijian Citizen is unable to test in country of departure, please contact the Department of Immigration (Pereeza Ali – email: pereeza.ali@govnet.gov.fj).
4. All Fijian Citizens will again be tested for COVID-19 following their arrival to Fiji. If they test negative for the virus, they will enter a mandatory 14-day quarantine in a government designated border quarantine facility. Accommodation and meals are covered by the Fijian Government. If they develop any COVID-like symptoms during the course of quarantine they will undergo additional tests for the virus. Regardless of whether or not symptoms display, all citizens must undergo a border quarantine exit test at day 12 of their 14-day quarantine period.
5. All testing costs are covered by the Fijian Government. If at any point a citizen tests positive for COVID-19, they will be entered into an isolation facility, with all costs covered by the Fijian Government.
6. It is possible to quarantine in a higher end facility. However, the citizen is required to pay all costs related to the quarantine, including accommodation and meals.
7. In regards to higher end quarantine arrangements, please contact the Nadi COVID-19 Response Team on email: nadiairportthealthoc@gmail.com.
