2. Areas subject to the emergency situation measures

3. Overview of the State of Emergency

Regarding the novel coronavirus disease,

- It has been confirmed that, compared to seasonal influenza, patients develop pneumonia with considerable frequency; and
- There are many cases in which it is difficult to identify the routes of transmission and the rapid increase of such cases has been confirmed; and, medical systems are being stretched.

Therefore, it has been determined that a situation has emerged that could cause a serious damage to the lives and health of the people and have a great impact the daily lives of the people and the national economy through the rapid and nationwide spread of infections.
