SHARE

Starting from October 21, new rules for interregional transportation at the yellow and red levels of the epidemic danger will come into force. They will apply to regular and irregular transportation. It is about road transport on bus routes, air and

rail transport of  
interregional  
communication.

**The rules will not  
apply to urban  
and intra-  
regional  
transportation.**

To use  
interregional  
transport in  
regions **with  
yellow and red  
levels of  
epidemic danger**  
it will be  
necessary to  
have one of the  
specified  
documents:

“yellow” or  
“green”  
international or  
domestic COVID  
certificate based  
on receiving a  
single dose of  
the vaccine or a  
full course of  
vaccination,  
issued on the  
portal “Diia” or in  
the application of  
the same name;

foreign  
COVID certificate  
of vaccination  
with vaccines

that are included  
in the WHO list  
allowed for use  
in emergency  
situations;

document  
on receiving a  
single dose of  
the vaccine –  
form 063-o,  
which can be  
obtained  
immediately after  
the procedure  
from the doctor  
who carried out  
the vaccination;

international  
vaccination  
certificate, which  
will be valid for  
one year from the  
date of the last  
vaccination. It  
can be issued by  
the doctor who  
carried out the  
vaccination at  
the vaccination  
point of the  
health care  
institution, or by  
the family doctor;

negative  
result of a PCR  
test or rapid test  
for COVID-19,  
valid for 72 hours  
from the time of

submission of  
the material for  
analysis.

The carrier is  
responsible for  
the availability of  
these documents  
for all drivers,  
crew members of  
the aircraft and  
passengers.

Currently, a  
COVID certificate  
based on the  
patient's  
recovery is being  
tested.

It is being  
developed by the  
Ministry of  
Health together  
with the Ministry  
of Digital  
Transformation  
and the National  
Health Service.

The issue of a  
COVID certificate  
on recovery is  
regulated by  
resolution of the  
Cabinet of  
Ministers of  
Ukraine No. 677.

The basis for  
obtaining a  
COVID certificate  
will be the

recovery of a person, if the diagnosis was previously confirmed by a positive PCR test. The document can be received no earlier than the 14th day after the diagnosis is established. It is important that both the fact of the disease (positive PCR test) and the fact of recovery must be confirmed in the electronic health care system.

This certificate will be valid for 180 days from the date of diagnosis. You will be able to apply for it in the Diia app. When it becomes available to users, it can also be used to travel by public transport between regions.

Obtaining paper certificates on

the fact of a  
coronavirus  
disease is not yet  
provided for by  
law.

Thus, from  
October 21, for  
interregional trips  
on public  
transport, it will  
be possible to  
use either a  
document on  
vaccination  
against COVID-  
19 or a negative  
test result for  
COVID-19.
