## Rules for working at the yellow and red levels of epidemic danger

28 October 2021 68

SHARE

Until December 31, 2021, Ukraine is quarantined. Since June 17, new quarantine regulations have been in effect in Ukraine. The State Commission on Technogenic and Environmental Safety and Emergency Situations has

established a  
“yellow” level of  
epidemic danger  
of the spread of  
COVID-19 in all  
regions of  
Ukraine starting  
from September  
23, 2021.

Within the yellow  
level it is  
forbidden in  
particular:

holding  
mass events with  
the participation  
of more than 1  
person on 4 sq.  
m of the building  
or territory area,

the  
occupancy rate  
of cinema halls  
and halls of other  
cultural  
institutions is  
more than 50%  
of the seats,

the  
occupancy rate  
of gyms and  
fitness centers is  
not more than 1  
person per 10  
square meters,  
etc.

Educational institutions will operate under the following conditions:

kindergartens and 1-4 classes of schools will operate in-person,

5-12 classes of schools and other educational institutions will require special conditions. To work normally, more than 80% of the staff of an educational institution must be vaccinated with at least one dose of the COVID-19 vaccine.

At the same time, the requirements for the yellow level are relaxed for vaccinated people.

Restrictions on the yellow level of epidemic security will not

apply if all participants (visitors) and all organizers of mass events, employees of cinemas, theaters, museums or other cultural institutions, gyms and swimming pools have at least one COVID-19 vaccination.

To work at the yellow level, it is enough to get at least one vaccination and have at least a “yellow” internal COVID certificate or a temporary 063-o certificate issued by a family doctor.

Also, for unhindered visits to institutions or events, it is allowed to have a negative result of PCR testing or rapid testing for an antigen. This result is valid for 72 hours.

In addition, you will be able to use a certificate of recovery.

Unvaccinated Ukrainians will soon be able to get it. It allows you to work, visit institutions and move around in the yellow and red quarantine zones for 90 days without restrictions (in accordance with the specifics of the resolution of the Cabinet of Ministers of Ukraine No. 1236). Read more about this certificate at <https://bit.ly/3whNUaa>

Obtaining paper certificates on the fact of a coronavirus disease is not provided for by law now.

If a visitor enters an institution or event without one of the listed documents, the rules and restrictions of the

yellow level  
automatically  
apply.

The final decision  
on whether to  
provide services  
only to  
vaccinated  
people or comply  
with all  
quarantine  
restrictions is up  
to the business  
owner.

At the same time,  
the State  
Commission on  
Technogenic and  
Environmental  
Safety and  
Emergency  
Situations can  
introduce a red  
level of epidemic  
danger in certain  
regions.

The red level of  
epidemic danger  
implies a number  
of restrictions  
that are being  
introduced in the  
region.

In particular,  
prohibited is:

operation of  
public catering  
establishments,

except for  
targeted delivery  
and orders,

work of  
shopping centers  
and other  
entertainment  
venues, cinemas,  
theaters, etc.,

work of  
educational  
institutions,  
except for  
kindergartens  
and primary  
schools,

operation of  
non-food  
markets and  
shops, gyms,  
swimming pools  
and fitness  
centers,

holding  
mass events,  
except for official  
sports events  
and matches of  
team game  
sports without  
spectators,

work of  
cultural  
institutions,  
except for  
historical and  
cultural reserves,

film and video  
shooting.

It is important  
that these  
restrictions will  
not apply if  
100% of  
employees  
(organizers) and  
visitors  
(participants) of  
these institutions  
(events) are fully  
immunized and  
have a green  
COVID  
certificate, a  
negative result of  
PCR testing or  
rapid antigen  
testing (valid for  
72 hours) or a  
certificate of  
recovery.

The work of  
banks, fuel  
stations,  
veterinary stores,  
pharmacies and  
all grocery stores  
at the red level is  
not limited, but  
compliance with  
anti-epidemic  
rules remains  
mandatory.

At the same time,  
local authorities  
can take

additional measures to strengthen anti-epidemic rules in the region.

The resolution to cancel the red level is made by the State Commission on Technogenic and Environmental Safety and Emergency Situations if the region achieves indicators that characterize the absence of signs that would correspond to the specified level.
